The death toll in the Israeli occupation of Gaza has exceeded 46,000. The Hamas-controlled Ministry of Health reported the information on Thursday (January 9). However, according to a research institute, the death toll in Gaza as of June last year was more than 64,000.

According to the Ministry of Health of Gaza, in the last 24 hours, another 70 Palestinians were killed by Israeli forces. 104 people were injured. With this, the number of dead in Gaza in this war that started on October 7, 2023 has reached 46 thousand 6 Palestinians. 1 lakh 9 thousand 378 people were injured.

On the other hand, a study published in the Lancet journal says that the actual number of casualties in the last 15 months of aggression is much higher. The research was done by teachers and students of London School of Hygiene, Yale University and other universities. According to their data, the actual death toll is 41 percent higher than the Gaza Ministry of Health figures. It is said that the death toll in Gaza was more than 64,000 until June last year. However, due to continuous attacks, it was not possible to keep an accurate account of him. 69.1 percent of the victims are women and children
